CHELTENHAM

CHELTENHAM is a watering place, a municipal and parliamentary borough and market town, the head of a petty sessional division and county court district, having bankruptcy jurisdiction; it has a district registry of the High Court of Justice and is the headquarters of the county police. For ecclesiastical purposes it is in the rural deanery and archdeaconry of Cheltenham and diocese of Gloucester. It is 94 miles by road from London, 109 by the Great Western railway via Oxford and 121 via Swindon. The Great Western railway has three stations here, that in St. James' square, which is the principal station, being near the centre of the town, which is 9 miles east-north-east from Gloucester by road and $7\frac{1}{2}$ by rail, 9 south from

Tewkesbury, 15 west from Stow-on-the-Wold, 13 north-east from Stroud by road and 19 by rail, and 22 south from Worcester. The London, Midland and Scottish Railway Company has a passenger station here, in the Queen's road (Lansdown), about $1\frac{1}{2}$ miles from the centre of High street, and a goods station in the Tewkesbury road, about half a mile from the former. The Banbury and Cheltenham Direct railway, via Kingham, completed in 1886, connects two of the principal sections of the Great Western railway and unites London and the Midland, Northern and Eastern counties by a shorter and more direct route from Cheltenham and the West of England. The Great Western railway affords direct communication with the South Western counties, via Andoversford and Cirencester. There is also a Race Course station which is open on race days only.

Motor omnibus services are provided by the Cheltenham District Traction Company.

The town was unrepresented until the passing of the Reform Act, 1832 (2 and 3 Wm. IV. c. 45), under which enactment it became entitled to one member; under the Boundary Act, 1868, a portion of the parish of Leckhampton was included in the parliamentary borough, and by the Redistribution of Seats Act, 1885 (48 and 49 Vict. c. 23), so much of the parish of Charlton Kings as lies to the north of the Cheltenham and Banbury railway was added. The borough was again extended, Nov. 9, 1893, by further additions from the parishes of Leckhampton and Charlton Kings. Under the Representation of the People Act, 1918, Cheltenham still returns one member. Until 1876 the town was governed by thirty commissioners appointed under the Cheltenham Improvement Act, 1852; but under the Royal Charter of Incorporation, obtained in September, 1876, the borough had a corporation, consisting of a mayor, deputy mayor, six aldermen and 18 councillors, and the municipal borough was divided into six wards, co-extensive with the parish. In 1933 the borough was divided into eight wards, and the council now consists of 8 aldermen and 24 councillors.

The town derives its name from the small river Chelt, which rises at Dowdeswell in the vicinity, and, in its course to the Severn, runs through the town, which is situated on an extensive plain, sheltered on the north and east by the Cotswold Hills; the principal street, High Street, is more than 1½ miles in length, and contains many modern buildings, interspersed with houses of more ancient date. The Promenade, leading from the High Street to Montpellier, extends for more than a quarter of a mile in a straight line and has an

avenue of spreading trees, with shops and terraces on either side. There are no less than 16 miles of tree-planted roads and streets in the borough, which is called the "Garden Town." The waterworks for the supply of water are on the slopes of the Cotswolds, in the Dowdeswell valley, and in addition a supply is obtained from the Severn at Tewkesbury. The town is lighted by electricity from works, erected in 1894, in the Arle road, the property of the corporation. Gas is supplied by a company established in 1819, from works in the Gloucester road. The corporation own the Pittville Spa and Gardens, and the Montpellier Spa, gardens, mineral wells and baths.

Pittville park, opened in 1894, includes the Pittville gardens and a lake, rowing course and recreation ground at Marle hill; the property comprises 15 acres; the length of the lake is 1,650 feet; and of the boating course 4,400 feet; the maximum width is 455 feet, and there is a total water area of 2½ acres; on the south side of the lake is an island, and at another point a waterfall, and there is a numerous flock of water-fowl, and the lake has also been stocked with fish; the park has been planted with hardy flowers so as to make it a wild garden on an extensive scale.

Eleven acres of land on either side of College road were purchased in 1928 by the Corporation and laid out as an ornamental park and recreation ground. The Corporation also bought Leckhampton Hill Estate, comprising about 400 acres, for the benefit of the town.

The South African War Memorial, on the Promenade, was unveiled in 1907 and includes the figure of a soldier in bronze.

In 1914 a statue in bronze, sculptured by Lady Scott (now Lady Hilton Young), was unveiled on the Promenade as a memorial to the late Edward Adrian Wilson B.A., M.B., F.Z.S. born in Cheltenham 1872, chief of the scientific staff, artist and zoologist of the British Antarctic Expedition, 1910-1913. He reached the South Pole January 17, 1912, and died with Capt. Scott on the great ice barrier, March, 1912.

In 1914 a stone statue of King Edward VII. surmounting a drinking fountain, was erected at Montpellier, given by the late Alderman J. W. Drew and Mrs. Drew.

An obelisk on a base of three steps was erected in 1920-21, opposite the municipal offices as a memorial to the 1,266 men from Cheltenham who fell in the Great War, 1914-18.

Naunton Park, situated to the south-east of the town, and opened in 1894, comprises about 8 acres, and is laid out as a recreation ground. There is also a recreation ground in Whaddon road.

Cheltenham has acquired its present important position from the celebrity of its mineral springs: the waters, which are more or less saline, were accidentally discovered in the year 1716, and their medicinal virtues gradually becoming known, his Majesty George III. visited the place in 1788, an event which at once led to the establishment of the spas: the original Old Wells were established about 1738, Montpellier spa in 1818, and the Pittville spa, with its gardens and lake, in 1830.

The latter was purchased by the corporation in 1889 and has saline springs surrounded by beautiful gardens and grounds, with walks and drives planted with trees six miles in extent. The gardens were enlarged in 1901 by the corporation to the extent of 3½ acres; and new recreation grounds close by were presented to the town in 1888 by J. T. Agg-Gardner esq. M.P. for the borough (ktd. 1916). The Pump room occupies an elevated position in the principal garden, and is a building in the Grecian style, in imitation of a temple at Athens; it is surrounded by a colonnade, the roof of which is supported by fluted columns. Upon the façade stand three figures representing Æsculapius, Hygeia and Hippocrates. The main building is roofed with a dome 70 feet high, round the interior of which is a gallery, while outside is a protected gallery from which views of the gardens and lake and of the town and neighbourhood are obtained.

The wells of the Pittville Spa are three in number, all characterised by containing relatively large quantities of carbonic acid, partially combined and free. In 1847 an analysis was made by Messrs. Abel and Rowney upon water drawn from the main well, 90 feet deep, and situated under the pump room, and a comparison of this analysis with that made by Professor T. E. Thorpe, of the Royal College of Science, South Kensington, in 1892, upon water taken from the

Pittville wells, Nos. 1 and 3, shows that the waters experienced no sensible alteration in composition during 50 years. The following statement of amounts of the principal constituents, expressed to the nearest grain per gallon, as deduced from the two analyses, brings out this result very clearly:

	1847.	1893.
Sodium Chloride	481	464
Sodium Sulphate	113	106
Sodium Bicarbonate	32	34
Potassium Sulphate	3	4
Calcium Carbonate	8	9
Magnesium Carbonate	11	12

Pittville well No. 2 Professor Thorpe found to be less rich in saline constituents than Nos. 1 and 3, and, though bearing a general resemblance to these, it has a relatively larger content of sodium sulphate, viz. 148 grains per gallon, and a proportionately lower amount of sodium chloride, viz. about 311 grains per gallon. He further stated that Pittville well No. 1 contains about 662 grains per gallon of saline matter, and No. 2 about 644 grains, by far the largest constituent in each case being common salt; both contain notable quantities of bromides and iodides, but the amount of lithia in either is so minute that it can only be detected by the spectroscope; these wells also contain a certain proportion of ferrous carbonate, but not sufficient, in his opinion, to allow them to be regarded as chalybeate. Professor Thorpe also reported to the Town Council on the Chadnor Villa well, the Cottage well in Christ Church road, and the Lansdown well. The water of the first two of these is magnesia saline; the Chadnor Villa well contains per gallon about 313 grains of saline matter, 118 grains being magnesium sulphate (Epsom salts), and 61 grains sodium sulphate (Glauber's salts); of sodium chloride and of bromides and iodides there is very little, and only minute quantities of ferrous carbonate and lithia. The Cottage well is reported to contain about 390 grains of saline matter per gallon, about one-third consisting of Epsom salts, and rather more than a quarter Glauber's salts, together with gypsum, chalk and common salt; only minute quantities could be traced of ferrous carbonate and lithium, and bromides and iodides were found to be altogether absent. Of the Lansdown well, the Professor said that it contained about

625 grains per gallon of saline matter, more than half being common salt and about a quarter Glauber's salts; the amount of iron, lithia, and of bromides and iodides was exceedingly small. From these results, it clearly appears that none of the Cheltenham springs can be regarded as chalybeate.

The parish church of St. Mary is a cruciform building of stone, in the Early English, Decorated and Perpendicular styles, consisting of chancel, clerestoried nave, aisles, transepts, north porch and a central tower with octagonal spire, containing a clock and a peal of 12 bells: in 1912 the spire was restored and the bells rehung, when two new bells were given by Alderman Winterbotham J.P.: on the east side of the north transept is a circular window 45 feet in circumference, divided by radiating mullions into 33 compartments: the original canopied piscina, considered one of the largest and most perfect of its kind in England, is of Decorated character, and forms a square recess, flanked by buttresses, with an arch on the east and north sides: in the chancel are brasses with effigies to Sir William Greville kt. Justice of the Common Pleas, 1513, his wife, three sons and eight daughters: there is also a mural monument to the wife of John English D.D. 1643, and a tablet to various members of the De la Bere family, 1783-1810: in the chancel is a monument of alabaster and marble to the Rev. Edward Walker D.C.L. perpetual curate from 1857, and first rector of this church, who died in 1872, and there is also a large and fine brass to the Very Rev. Francis Close D.D. rector here, 1826-56, and dean of Carlisle, 1856-82. The stained east window was erected in 1880 at the cost of the Freemasons of Cheltenham: there are memorial windows to Daniel James Humphris, the Welch family of Arle, and several others, the three larger ones at the west end being of a most elaborate and costly character, one being the gift of the parishioners, another the gift of the Baron de Ferrieres and the third that of W. H. Gwinnett esq. J.P. in memory of his parents: the south transept retains a piscina and aumbry: in the churchyard are two stone coffins. The church was restored in 1877: the vestry to the north of the chancel and a porch to the south aisle were added in 1893: an oak reredos

Middleton esq.: there are sittings for upwards of 1,400 persons.

B. Richmond R.A., F.S.A. and J. Eadie-Reid: a reredos was erected and the walls lined with jasper and marble from designs by Mr. H. A. Prothero, architect, of Cheltenham: in 1922 a bronze tablet was erected just inside the main entrance to the church in memory of the men of the parish and the men of the 10th Batt. Gloucestershire Regiment who fell in the Great War, 1914-18, and in 1932 the colour of this battalion was laid up in the church: there is also, in the outer porch a wooden cross brought from the battlefield: the church was restored internally in 1887-97, and re-decorated in 1925, and affords about 1,600 sittings. The register dates from the year 1865. The living is a

ADVERTISERS PLEASE NOTE!

DURING the many years in which we have studied and handled advertising we have observed that the cardinal points of an advertisement are as follows:— (a) What is being sold; (b) Name of seller; (c) Address of seller. Most readers are more interested in the goods or expert knowledge being sold than in the advertiser's name and address. The name and address is looked for when the advertisement has made its appeal. Send your copy to the Advertisement Department,
