MR. F. E. KESSELL,
NEWLY-APPOINTED LIBERAL AGENT
FOR CHELTENHAM, AND SECRETARY
TO THE CHELTENHAM
LIBERAL ASSOCIATION.

Mr. Kessell is a Cornishman. Though he was engaged for many years in commercial life, yet he always took a lively interest in politics, and rendered valuable assistance in his spare time to the Liberal party. His work came under the notice of Ald. Thompson, ex-Mayor of Richmond and visiting secretary on behalf of the Liberal Federation to the Home Counties, and on that gentleman's advice he adopted Liberal organisation work as a profession. He served his novitiate under Mr. Fred Nash at headquarters. Since then he has acted as agent in over sixty elections, and has held residential posts as agent in the Brentford Division of Middlesex, the Lewes Division of Sussex, Brighton, and the Epsom Division. He is a man in the prime of life, and likely to prove a great acquisition to the Liberal party in Cheltenham.

THE CORN TRADE.

The "Mark Lane Express" says:—There is steady progress making in ploughing and drilling, and the area sown to wheat this October may easily prove larger than a year ago. Despite a 10 per cent. fall in prices, wheat sown this month will not be governed in selling value by the prices of the present cereal year. New threshings show a yield of less than a local average in most cases, but the quality is better on the year, and the miller is more satisfied with the sample. In France, on the other hand, new wheat weighs only 60 to 61 pounds per bushel, against 62 pounds last year.

PRESENTS FOR THE HON. AND MRS. M. H. HICKS BEACH.

A large and influential gathering assembled at the Victoria Chambers, Gloucester, on Saturday afternoon for the purpose of making public wedding presents to the Hon. M. H. Hicks Beach, the popular Conservative M.P. for the Tewkesbury Division, who was married a year ago. The first present, which consisted of a pastel painting of Mr. Hicks Beach in his uniform as a Territorial officer and a piano for Mrs. Hicks Beach, came from the Conservative party in the division; the second, which was a silver cigar box of most ample proportions, came from the Gloucester Conservative Club, of which the recipient is the president, and the third, also a silver cigar box, was presented by the staff of the Gloucester Railway Carriage and Wagon Co., of which the member for the Tewkesbury Division is a director.

Col. Curtis Hayward, who presided, made the first presentation, Councillor James Bruton the second, and Mr. J. W. Howard (manager of the Wagon Works) the third. All three joined in wishing the member and his wife long life and happiness.

In returning thanks Mr. Hicks Beach touched but lightly on current politics; indeed save for expressions of gratitude for the presents bestowed upon him and his wife his only general reference was to the question of payment of members. "I am not," he said, "in favour of it" (cheers). If every member of Parliament were to receive £200 or £300 a year he thought it would take away all the charm and glamour which at present attached to membership of Parliament.

On the proposition of Mr. G. E. Lloyd-Baker, Col. Curtis Hayward was accorded a vote of thanks for presiding, after which the proceedings terminated.

THE SPELL OF THE EDELWEISS.

I confess it leaves me cold; but, then, I think the fault is not mine. Once, on an October night, I saw it bring tears to the eyes of a Swiss waiter in a Soho restaurant. Planted on the pseudo-Tyrolese hat of a German tourist, it had evidently been forgotten there since summer and holiday-time. But the waiter caught sight of it, and forgot his eighteenpenny dinner of many courses in blissful recollections of Lome, of Alpengluehen, of cowbell chimes, and other manifestations peculiarly Swiss and particularly attractive to Switzerland's sons in exile. He slowered his attentions upon the Tyrolese hat, whereas the rest of us waited and endured neglect in patient resignation. And the key to the mystery lay, not in any hopes of pecuniary reward, but in a bunch of shrivelled flowers, which none but he and I had noticed.—"The Graphic."

CONFETTI AT WEDDINGS.

In his "Parish Magazine" the Rev. R. W. Carew Hunt, vicar of St. Giles's Church, Reading, writes: "I feel that the time has come when I ought to draw your attention to the silly and vulgar practice of throwing masses of paper confetti over newly-married couples as they come out of church. The old custom of throwing a few grains of rice, though a foolish one, was more or less harmless, and it was probably viewed with favour at least by the birds of the air. But the throwing of thousands of small paper discs has nothing whatever to commend it. A Christian marriage should not be an occasion for folly of this kind, and most emphatically the church and the surroundings of the church should not be littered with confetti, as is now the case. It is monstrous that the church cleaners should be given so much trouble on account of this thoughtless and irreverent practice."

Mr. Alfred H. Stokes, till recently Chief Inspector of Mines in the Midland District, died suddenly on Monday at Derby. He was in his 69th year.

THE GLOUCESTERSHIRE CENTENARIAN.

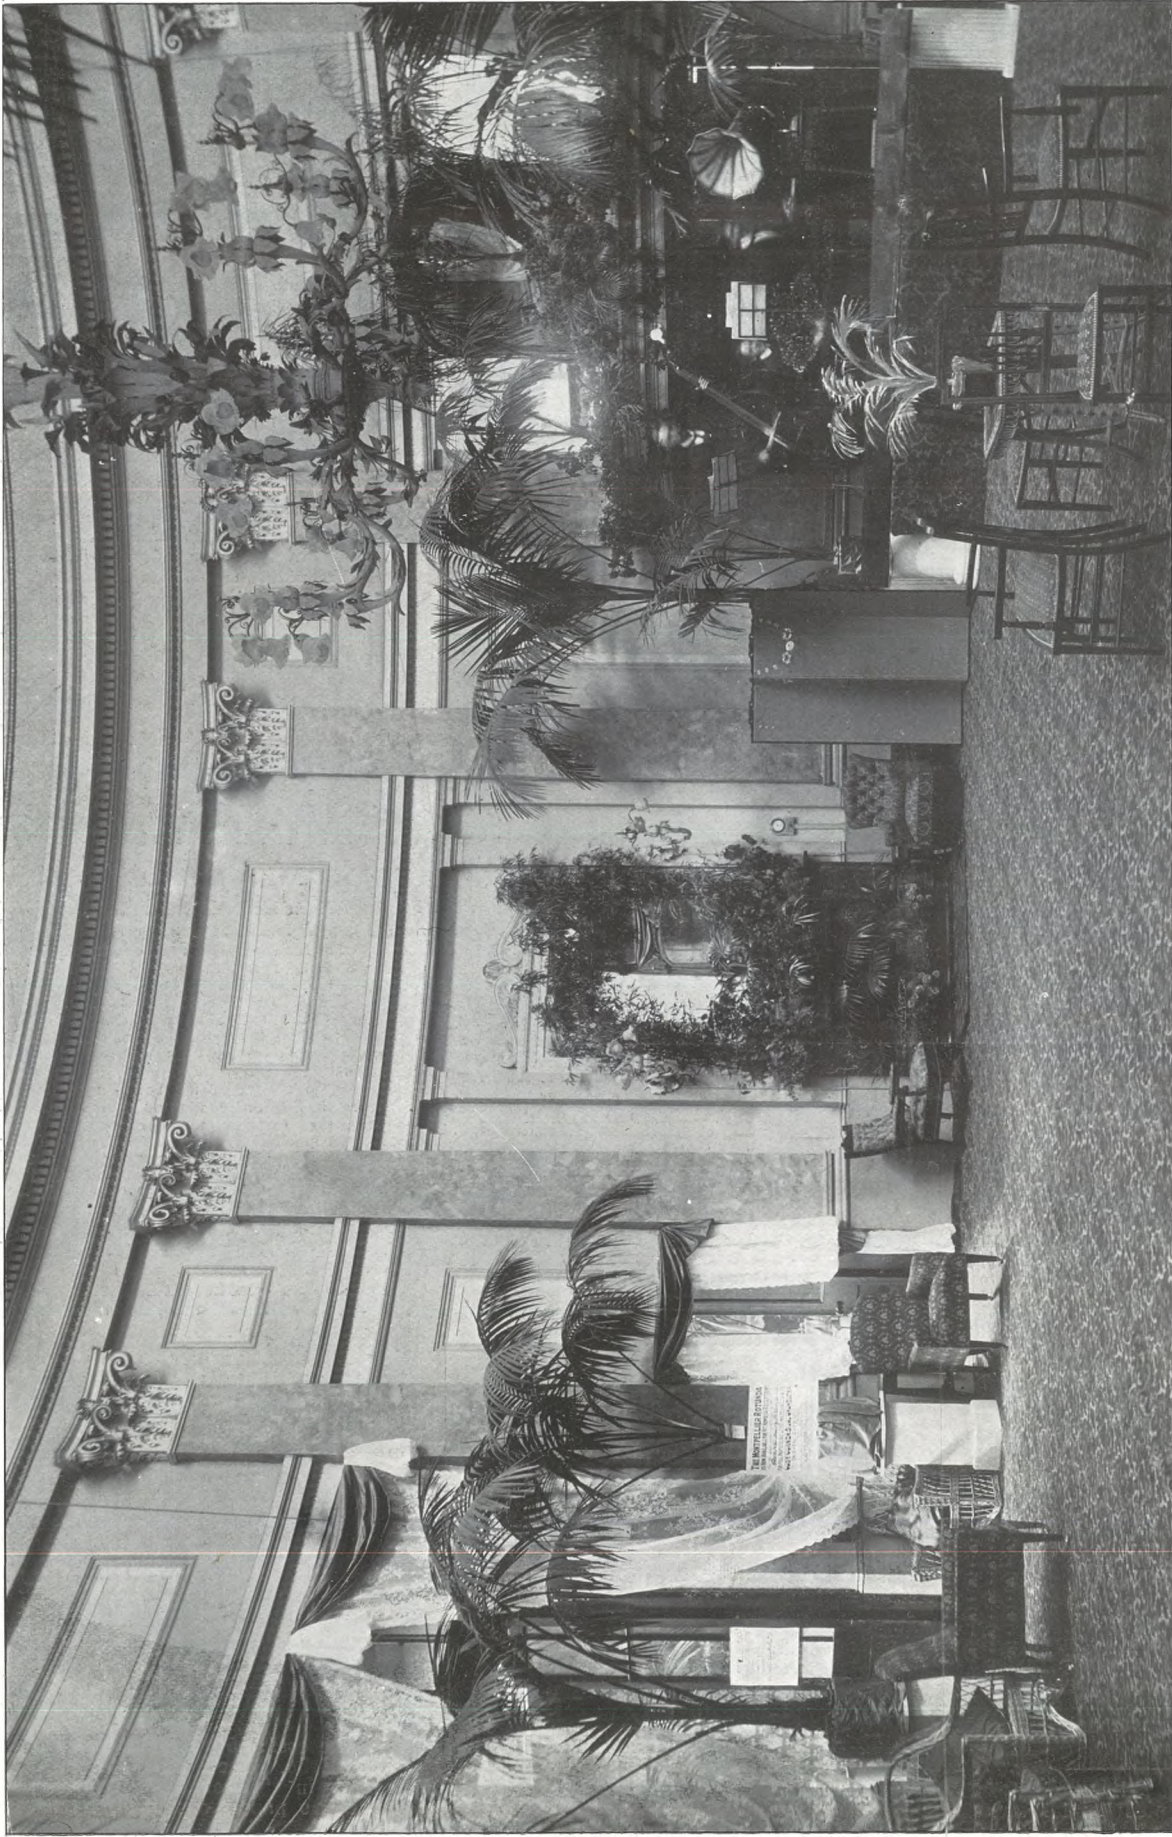

On Sunday, Oct. 9, 1910, Mr. Thomas Moss Enstone, of Sandhurst-lane, near Gloucester, certainly entered upon his 103rd year, as proved by the only documentary evidence extant, namely the parish register of The Leigh, which shows that he was baptised in the church there on Oct. 9, 1808. The old gentleman is very cheerful, despite the fact that he has been an invalid since Dec. 22, 1906, when he was knocked down by a cyclist as he was crossing Eastgate-street, and then sustained a broken thigh. His bodily health is good; in fact he is putting on flesh. He remarked to one of his grandchildren a day or two ago that he felt as if he should live 102 years longer.

On Sunday the harvest festival took place at The Leigh Church. This day was also the birth anniversary of Mr. Thomas Baldwin, the worthy master of the St. Michael's Juniors Society of Gloucester, and the 102nd anniversary of the christening at this church of Mr. Thomas Enstone. The ringers, who were F. Bulton 1, W. J. Sevier 2, C. Coldrick 3, H. Finch 4, G. Watts 5, C. Dyson 6, and W. Hughes, rang special changes on the bells in honour of the events.

THE "NEW" ROTUNDA. WHERE CHELTENHAM SOCIETY WILL ENTERTAIN THIS WINTER.

This view of the interior of the Rotunda was taken on Monday last, when the ORIENTAL CAFE CO., of the OOSY CORNER, PROMENADE, gave a private inspection of the handsome suite of rooms which they have elegantly re-furnished throughout for their patrons' At Homes and Receptions, now that they no longer have the Town Hall Balconies at their disposal for After-noon Parties. White and gold draperies, handsome mirrors, rich carpets and upholstery, and a beautiful floral scheme (by Mr. G. Pates, of St. George's Road) completely transform the appearance of the ROTUNDA, and the delightful comfort of the spacious rooms for At Homes, compared with the crowded parties often met with, was the subject of general remark by the large number of visitors who accepted the invitation of the Café Co. Inclusive estimates can be given for music and smart society entertainers, while moderate charges will be an outstanding feature of their catering; and the company have already several At Homes arranged for their patrons at the Rotunda as a result of their enterprise.

MR. & MRS. DANIEL FORD.

OF BRIDGE FARM, RUDFORD, NEAR GLOUCESTER,
WHO CELEBRATED THEIR DIAMOND WEDDING
(SIXTY YEARS) OCTOBER 12, 1910.

A female debtor at Bloomsbury County Court on Tuesday, being asked the business of her husband, said he was a plasterer.—Judge Bacon: Is he working?—Debtor: Not now.—Judge Bacon: I mean where does he happen, if at all, to be plastering?—Debtor: He's dead!

At a town's meeting on Tuesday night, convened by the Mayor of West Bromwich, it was decided to open a million penny fund for the purpose of clearing off a debt of £3,000 on West Bromwich District Hospital and of endowing a bed in the hospital as a memorial of the late King Edward.

FIRST INSPECTION OF CHELTENHAM CORPS OF ST. JOHN'S AMBULANCE BRIGADE,

AT NORTH STREET DRILL-HALL, OCTOBER 15, 1910, BY DR. J. S. GRIFFITH (BRISTOL), DEPUTY-COMMISSIONER FOR SOUTH AND WEST OF ENGLAND.

Back row:—Inspector Whyton, P.C. Fluck, Dr. Meyricke Jones, Dr. Blakeney, Dr. Macleod Munro, Major P. G. Shewell (chief superintendent), Mr. Tandy, P.S. Bunker, Mr. Mullins, P.C. Williams, Mr. Dancy, Dr. Hebblethwaite (superintendent secretary), Dr. Hutton, P.S. Keen, Mr. Pickering.

Front row:—Police-Supt. Hopkins, Mrs. M. Wheeler, Mrs. Blakeney, Deputy-Commissioner Dr. J. S. Griffith, Mrs. Percy Shewell, Mrs. Gilkes, Miss White, and Mr. Hill.

THE COMMON VICE OF OVER-EATING.

One has but to keep one's eyes open when rubbing shoulders with the crowds that throng any big city of this England of ours to see that at least a fair percentage indulge too freely in the pleasures of the table. Increasing girth may make oneself conscious of the fact in one's own case, and yet it has probably never entered one's head that overfeeding, coupled with even a modicum of alcohol refreshment, is the causal agent of cold and influenza! Microbes are but secondary causes, the real cause being our own indulgence. It may not be long, Dr. Hooker maintains, before the possession of a cold will seem a shameful thing to its victim, instead of making him, as now, an object of pity. Therefore avoid colds by eating less, and so prevent the tissues becoming clogged. Microbes cannot live unless they have the suitable culture-medium supplied by excess. No fancy diets are necessary, but alcohol should be avoided, and as much fresh air as possible taken into the lungs. Cold, draughts, and damp will then have no terrors, for a cold is here to-day and gone to-morrow when the individual is prepared. In most cases a trial of the preventive measures would not, we think, lead to starvation, for undoubtedly most of us eat too much. We have no personal experience of the remedy, so we cannot speak of it at first hand. "The Hospital."

Good Homes for Servants.

The domestic servant who wants a good place should state her need in the form of a small advertisement under the heading of "Situations Wanted" in the Want Columns of the "Gloucestershire Echo" and "Cheltenham Chronicle."

The cost: 15 words for six days in "Echo," One Shilling; 20 words once in "Chronicle," Sixpence; the two papers combined, 1s. 3d.

Mrs. Winston Churchill, wife of the Home Secretary, paid a visit to Bow-street Police-court on Tuesday morning, and for an hour or so occupied a seat in counsel's box listening to Mr. Marsham disposing of the night charges,

LAW AS TO EXCURSION TICKETS.

An important point in excursion ticket law was decided in the Shoreditch County Court on Tuesday. The plaintiffs were the S.E. and C. Railway Company, and they sued William Saunders, of Bentham-road, to recover 3s. 6d., being two excess fares to Teynham on tickets from London to Sittingbourne. The defendant and his wife took cheap week-end tickets to Sittingbourne, but went on to Teynham, where the excess was offered and refused. The defendant's wife said they had often gone the same journey, and it was usual for the train to stop some time at Sittingbourne, which would give them a chance to buy a ticket to Teynham.—Mr. Fraser (for the company): I should like to point out the important point is that the defendants never intended to go to Sittingbourne, and it is against the excursion law to go to a station you do not book to.—Defendant's wife: We offered to go back to Sittingbourne, but permission was refused.—Judge Bray: You must pay, as on excursion tickets you must get out at the station.—Defendant: We would have bought tickets to go on if we had had time, as usual.—Judge Bray: It is of importance to excursionists, I know, but I doubt if you may go on in the same train, and you started out to go to Teynham, not on an excursion to Sittingbourne. There must be a verdict for the plaintiffs, but without costs.

**DIAMOND WEDDING OF MR. & MRS. DANIEL FORD,
OF BRIDGE FARM, RUDFORD, NEAR GLOUCESTER, ON OCTOBER 12, 1910.**

They were married at Tewkesbury Abbey on Oct. 12, 1850; Mr. Ford being a native of Huntley, and Mrs. Ford of Beckford. They have three sons and one daughter living, eighteen grandchildren, and seven great-grandchildren, most of whom were present at the celebration of the occasion. Mr. Ford is a farmer, having lived on his present farm thirty-four years, and is well known as the proprietor for many years of a portable thrashing machine.

Back row.—Mr. Thomas, Mr. F. G. Ford (grandson), Mrs. F. G. Ford and daughter (great-grandchild), Miss Finch, Mr. John Barnes (Mrs. Ford's brother), Miss Finch, Mr. James Need, Mrs. J. Need.

Second row.—Mrs. Sidney Ford, Mrs. John Ford, Mrs. Trigg, Mrs. Heaven, Mrs. Finch, Mrs. Rimell (granddaughter), Mr. Walter Jones (son-in-law).

Front row.—Miss E. Ford (granddaughter), Mr. Sidney Ford (son), S. J. Ford (grandson), Mrs. Bamford (sister of Mrs. Ford), Mr. Daniel Ford, Norman Rimell (great-grandson), Mrs. Daniel Ford, G. Rimell (great-granddaughter), Mr. Geo Ford (son), Mrs. W. Jones (daughter), Dorothy Ford (granddaughter).

ROLLER-SKATING IN BERLIN.

TRAMS AND RAILWAYS ADVERSELY AFFECTED.

Roller-skating is quite general in all the streets of Berlin, and roller-skaters have become one of the most remarkable features of the German capital. Roller-skating was introduced there by an enterprising American firm, which opened the first rink and sent excellent roller-skaters through the streets by way of advertising the attractions of their own establishment.

Roller-skating quickly "caught on," and the Berliners soon found that it was not only a pastime, but could also be utilised in the more serious affairs of their everyday life. Now many big business firms supplement their delivery cards by express messengers on roller-skates, who in this way can traverse great distances at a great speed, so that it is quite a common experience for customers at shops to have their purchases sent to their homes by roller-skaters.

The Berlin Messenger Boys Company,

realising the advantages of the roller-skate in their particular line of business, introduced some time ago a brigade of juvenile skaters for the conveyance of express communications. Morning and evening many thousands of workers in all sorts and conditions of occupations use the roller-skate to pass quickly between their homes and places of employment, and the receipts of the local tramways and suburban railways have appreciably diminished in consequence. Schoolboys and schoolgirls, too, find the roller-skate a far more agreeable mode of conveyance between their homes and classrooms than the tram or train.

To dwellers in other great cities it is a strange sight to see long lanes of men, women, and children rushing at headlong speed through the streets of Berlin on roller-skates, and nervous pedestrians complain that one more terror of the public ways has been created to torment them, but there has been a general disposition to welcome the innovation as one likely to improve the health and to add to the pleasure of large masses of the population.

The police, so strict in many respects, have been remarkably generous in permitting the unlimited use of the streets for this purpose. The conditions for roller skating are, of course, exceptionally favourable in Berlin, where there are so many fine and broad streets well paved with asphalt. Recently, however, roller-skating in the public thoroughfares has increased to such an extent that it began to be a serious impediment to ordinary traffic, and a number of roller-skaters, who were too venturesome, have been the victims of accidents, some of which have ended fatally.

Partly to remove an obstacle to traffic and partly to protect roller-skaters from the possible consequences of their own recklessness, the police have now prohibited the use of roller-skates in six of the busiest streets of the capital, without imposing any further restrictions on this mode of travel in all the other parts of the town, so that Berliners can still indulge in their latest popular pastime without any serious loss of liberty of movement.

DEVELOPMENT OF THE BAROMETER.

Torricelli invented the barometer in the seventeenth century. It was a tube of mercury then; in many cases it is a tube of mercury still. The tube is a yard long, and about half-an-inch in diameter. It is open at one end and closed at the other, and is partly filled with mercury. The open end dips into a little trough of mercury, or is bent slightly upwards in the form of a tiny cup. The top of the mercury column is exposed to view, and by means of a scale alongside of the column its height is read off. These are the essentials in the construction of the ordinary instrument. What is known as the wheel barometer, so often met with in houses (says "T.P.'s Weekly") is an ingenious variation of Torricelli's idea. This barometer was invented by Robert Hooke, probably the greatest philosophical mechanic of his day. It is intended to indicate the weather without observing the mercury itself. There is the usual tube, but bent at the bottom into a short leg. In this leg a little glass float rests upon the surface of the mercury. A cord attached to the float passes over a pulley. The pulley is furnished with a pointer which moves round the dial, the moving agency being the rising or falling mercury, which lifts or lowers the float. As regards modern barometers, everybody is familiar with the aneroid, a very beautiful, portable, and accurate instrument, independent of a column of mercury and the danger to which it is liable from spilling. The aneroid consists of a metal box partly filled with air. One face of the box is corrugated, and so thin that it yields to the variations of atmospheric pressure. Then there is the self-registering barometer, which writes its record on paper wound on a drum. The drum revolves by clockwork. A pencil connected with the barometer presses upon the revolving paper, and rises and falls with the mercury. When the mercury falls the line drawn by the pencil slopes down; when it rises the line slopes up.

It is freely stated in musical circles, says the "Western Mail," that Dr. Cowen is practically certain to succeed Dr. Cummings as principal of the Guildhall School of Music. The post is worth £1,000 a year, with a retiring pension of £500 a year.

SCENE IN "DON" (ACT I.)
 AT CHELTENHAM OPERA
 HOUSE NEXT WEEK.

Application was made in the King's Bench Division on Tuesday for permission for the case Hay v. Bruce to stand out of the list for a fortnight, on the ground that there was a prospect that the case would be settled. Counsel stated that the suit would be called "a society libel suit." His lordship gave the necessary permission, and remarked that he hoped he would not hear of the matter again.

THE FINEST BIG-GUN SHOT IN THE BRITISH NAVY.

A CHELTENHAM MAN.

Seated in centre of above photograph, wearing a medal, is Seaman A. H. Bailey, of Granville-street, Cheltenham. He won the medal last year for the finest shooting in the Navy with the 12-inch guns. Above is represented his target crew of H.M.S. Achilles. The size of the target is 10ft. by 8ft., distance 1,400 to 1,500 yards, ship steaming 12 knots per hour; the projectile weighed 380lbs, with a three-quarter charge of cordite weighing 300lbs. Hits obtained 5½, out of six rounds fired in 77sec. Since this photo was taken this result has been beaten by another ship.

FARMERS AND MILK.

An admirable plan for dealing with milk has (says "Country Life") been adopted by those Wiltshire farmers who live in the neighbourhood of Chippenham. They have formed themselves into an organisation, which already numbers two hundred and fifty members, for the purpose of dealing with their milk in a manner to avoid waste. As everybody knows, the industry at the present moment is a very uncertain one, as during summer, when the flow of milk is greatest, the difficulty of disposing of it is most felt. The plan adopted is to erect a dairy for the production of butter and cheese, and for the farmers to become wholesale dealers, supplying the distributing centres in London. They are thus enabled to fulfil the orders of the day, and if there are not sufficient to use up all the milk, what is left over is made into butter, cheese, and other by-products. The scheme is sound and economical in conception, and ought to work out to the profit of those who are engaged in it.

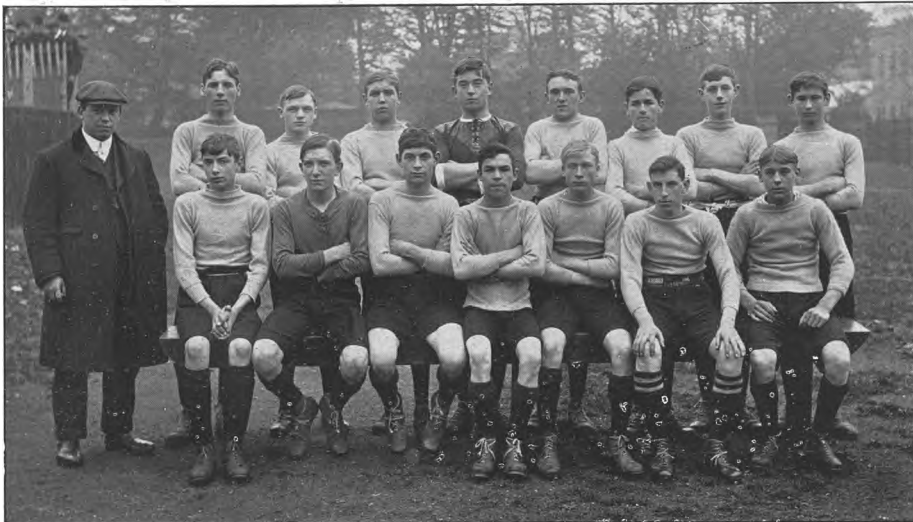

WHERE CRUELTY BEGINS IN HUNTING.

Digging a fox out in cold blood, with terriers inside the earth barking and screaming at and fighting the wretched, hunted creature, with twenty couple of hounds waiting above, giving tongue to their desire for its blood, is where cruelty commences. Slowly and gradually the diggers work down with pick and spade to where the fox is panting and cowering in an agony of terror. No hope! No chance! No way to move or turn, he is cornered, helpless—a hundred against one. Those who have seen this sort of thing know it is a one-sided fight, and Englishmen are generally lovers of fair play.—Leonard Willoughby, in "The Bystander."

In connection with the tax of a penny per head levied in respect of passengers embarking and disembarking at Manx ports, the Isle of Man Harbour Commissioners have published a return showing that during the holiday season, from May to September inclusive, 468,271 persons landed at Douglas. This is an increase of over 22,000 on last season, and of nearly 16,000 on 1907, the previous best on record. Ramsey arrivals for the season were 12,853, nearly 1,700 better than last year. Peel arrivals were 9,321.

MISS DAISY HALLING,

Who two years ago left the English stage to preach and teach Socialism. At the request of her old admirers on the stage, however, she occasionally gives dramatic recitals from the works of the advanced school of playwrights. Miss Halling, who has appeared with various companies at the Cheltenham Theatre during her twenty years' career, will give a recital under I.L.P. auspices in the Town-hall at 8 p.m. next Wednesday, her selections being from Bernard Shaw and Henrik Ibsen. She is a capable actress, a talented authoress, and with charming presence and undoubted elocutionary powers holds the attention of her audience from start to finish.
