CHIMNEY FIRES

First of all call the Fire Brigade. Then damp down the fire by throwing on a few handfuls of salt (DON'T USE WATER). Pull away from the fireside, rugs, carpets, furniture and anything else likely to be set alight by falling soot.

Eliminate draught by closing doors and windows.

Watch that sparks from the chimney don't set fire to anything outside.

If it is a minor fire it should burn itself out fairly quickly, but the Fire Brigade will make sure that it's properly out.

Chimney fires can be prevented by having your chimney swept at least once a year — even more if you are burning a lot of wood or peat. If you do burn wood, make sure that it is quite dry and let it burn lightly. A lot of smoke makes a lot of soot and this is what catches fire.

You can find the name, address and telephone number of a Sweep by looking under the relevant heading in your TRADEFINDER.

CHELTENHAM 56934

WATER POURING FROM THE W.C. OVERFLOW

There could be three reasons for this:

1. The ball float is leaking
2. Needs adjusting or
3. The valve is faulty

To find out what is wrong, remove the top of the lavatory cistern, flush the lavatory then watch the ball float. If the arm does not lift up properly, this probably means the ball is leaking. Unscrew the ball float at the end of the arm and replace it with another of the same size (preferably plastic)

If the water is overflowing badly, turn off the water at the mains, lay a strip of wood across the top of the cistern, tie a piece of string around the arm and attach it in the closed valve position to the wood. Turn the mains water on again. The W.C. cannot be flushed until the ball float is replaced.

If you find the ball is not leaking, flush the lavatory again and this time raise the arm gently. If the in-flow of water stops completely, all you need do is bend the arm downwards slightly in the middle to cut off the water at a lower level in the tank.

If when you lift the arm, water still trickles in, you have a worn washer that needs renewing or faulty valve that will have to be repaired or replaced. Sometimes a piece of grit may be caught in the washer. The replacement of a valve requires professional attention.

You will find the name, address and telephone number of a Plumber in your TRADEFINDER.
