ESCAPING GAS

If it is bad, throw open all
the doors and windows, put
out any open fires, using salt,
and do a quick check that all
gas taps are turned off.

A sudden draught can easily
blow out a low gas light or
pilot jet, so before contacting
your local Gas Board, check
the relevant appliances.

You may be able to trace
the leak by the smell, but on
NO account use a lighted
match to try and find it. If you
can trace the leak, you can
make a temporary repair, until
the man from the Gas Board
arrives, by rubbing the pipe
with wet soap and then bind-
ing it round tightly with
adhesive or insulation tape.

You will find the address
and telephone number of the
local Gas Board under the
Emergency Services heading in
your TRADEFINDER.

Fire Prevention

1. Have your chimney swept at least once a year.
2. Never leave a room without putting a guard in front of a fire, particularly where fires are left in all night.
3. Keep matches out of reach of children
4. Make sure that the air can circulate around a light bulb.
5. Paraffin heaters should be secured to a floor or wall so that they cannot be knocked over. They should have KITE mark for safety.
It is very important to follow the manufacturers' instructions for cleaning and upkeep of an appliance.
6. When buying any new appliance, you should first read the manufacturers' instructions carefully.
7. Long flexes are dangerous — they are easily tripped over.
8. Don't hang clothes to dry over convector heaters — the air vent must always be kept clear.
9. Make sure that things are not left in front of fires that work on a time switch
10. Don't use too many adaptors on one plug. There is a danger you will overload the circuit.
11. If the same fuse blows twice, get an electrician in. You will find the name, address and telephone number of an Electrician under the relevant heading in your TRADE-FINDER.
12. Avoid having your cooker near the window where curtains could blow across the hot plates. This is dangerous.
13. All children's nightclothes must be non-flammable. If you are making them yourself, check that the material is non-flammable before you buy it.
