ESCAPING GAS

If it is bad, throw open all the doors and windows, put out any open fires, using salt, and do a quick check that all gas taps are turned off.

A sudden draught can easily blow out a low gas light or pilot jet, so before contacting your local Gas Board, check the relevant appliances.

You may be able to trace the leak by the smell, but on NO account use a lighted match to try and find it. If you can trace the leak, you can make a temporary repair, until the man from the Gas Board arrives, by rubbing the pipe with wet soap and then binding it round tightly with adhesive or insulation tape.

You will find the address and telephone number of the local Gas Board under the Emergency Services heading in your TRADEFINDER.

CHIMNEY FIRES

First of all call the Fire Brigade. Then damp down the fire by throwing on a few handfuls of salt (DON'T USE WATER). Pull away from the fireside, rugs, carpets, furniture and anything else likely to be set alight by falling soot.

Eliminate draught by closing doors and windows.

Watch that sparks from the chimney don't set fire to anything outside.

If it is a minor fire it should burn itself out fairly quickly, but the Fire Brigade will make sure that it's properly out.

Chimney fires can be prevented by having your chimney swept at least once a year — even more if you are burning a lot of wood or peat. If you do burn wood, make sure that it is quite dry and let it burn lightly. A lot of smoke makes a lot of soot and this is what catches fire.

You can find the name, address and telephone number of a Sweep by looking under the relevant heading in your TRADEFINDER.

Fire Prevention

1. Have your chimney swept at least once a year.
2. Never leave a room without putting a guard in front of a fire, particularly where fires are left in all night.
3. Keep matches out of reach of children.
4. Make sure that the air can circulate around a light bulb.
5. Paraffin heaters should be secured to a floor or wall so that they cannot be knocked over. They should have KITE mark for safety. It is very important to follow the manufacturers' instructions for cleaning and upkeep of an appliance.
6. When buying any new appliance, you should first read the manufacturers' instructions carefully.
7. Long flexes are dangerous — they are easily tripped over.
8. Don't hang clothes to dry over convector heaters — the air vent must always be kept clear.
9. Make sure that things are not left in front of fires that work on a time switch.
10. Don't use too many adaptors on one plug. There is a danger you will overload the circuit.
11. If the same fuse blows twice, get an electrician in. You will find the name, address and telephone number of an Electrician under the relevant heading in your TRADE-FINDER.
12. Avoid having your cooker near the window where curtains could blow across the hot plates. This is dangerous.
13. All children's nightclothes must be non-flammable. If you are making them yourself, check that the material is non-flammable before you buy it.
