ESCAPING GAS

If it is bad, throw open all the doors and windows, put out any open fires, using salt, and do a quick check that all gas taps are turned off.

A sudden draught can easily blow out a low gas light or pilot jet, so before contacting your local Gas Board, check the relevant appliances.

You may be able to trace the source of the escape by the smell, but on NO account use a lighted match to try and find it. If all your gas appliances are turned off and a smell persists, you should notify your area Gas Board immediately, turn off the gas at the meter, extinguish all naked lights and open doors and windows.

You will find the address and telephone number of the local Gas Board under the Emergency Services heading in your TRADEFINDER.
